Bogor, Indonesia

Informatics Engineering graduate with a strong interest in full-stack web development. Experienced in building 3+ web-based applications using Laravel and React.js, including a digital document submission and approval system that reduced paper usage by 70%. Familiar with RESTful APIs, database management, and end-to-end web workflows.

Work Experience

Web Developer - Bogor, Indonesia

Jan, 2025 - Present

Freelance

- Developed a warehouse inventory management system using Laravel (RESTful API) and React.js, enabling real-time stock updates and automated tracking of incoming and outgoing goods.
- Implemented stock opname and minimum stock notification features, helping reduce manual stock errors by over 90%.
- Designed responsive and user-friendly interfaces using React.js and Tailwind CSS, improving usability for warehouse staff.
- Optimized database queries and table structures, reducing application response time by approximately 40%.
- Built additional web applications, including a Kanban Board for task and to-do management, to support organized workflows and progress tracking.

PT Ekatunggal Tunas Mandiri - Citeureup, Indonesia

Oct, 2025 - Jan, 2026

IT Staff

- Provided troubleshooting support for hardware, software, network, and CCTV systems to ensure daily operational continuity.
- Installed, configured, and maintained computers and supporting devices for company users.
- Managed monthly data backups and synchronization using Synology NAS, improving data security and availability.
- Monitored and maintained LAN/WiFi networks to ensure stable connectivity for internal user
- Created a web-based document submission and approval application that simplified the internal approval process and reduced paper usage by around 70%.

PT Unggul Karya Semesta – Gunung Putri, Indonesia

Oct, 2021 - Sep, 2024

Operator Produksi

- Operated production machinery according to standard operating procedures.
- Ensured product quality met company standards and production targets.
- Maintained efficiency and safety throughout the production process.
- Developed strong discipline, attention to detail, and teamwork in a fast-paced environment.

Project Experiences

Digital Submission and Approval System - Internal Company Project

Oct, 2025 – Jan, 2026

Full-Stack Developer

- Developed a digital submission and approval system using Laravel (Inertia) and React.js.
- Implemented role-based access for Admin, Employee, and Director.
- Built dynamic document forms and configurable approval workflows including approval, rejection, revision, and cancellation processes.
